3Y0J Bouvet Island

Press Release from the Intrepid-DX Group

3Y0J Dxpedition to Bouvet Island, January/February 2023

As we completed our successful VP8STI-South Sandwich and VP8SGI-South Georgia DXpeditions in 2016, we began to plan for our next Dxpedition. Our target is the Norwegian Island Bouvet. This is the #2 most wanted DXCC entity.

At this time, it gives us great pleasure to announce that we have joined forces with Intrepid Norwegian DXpeditioner Ken Opskar-LA7GIA in our quest to activate Bouvet. Together, in January 2023, 14 men will board the Braveheart in Capetown and make the treacherous voyage to Bouvet. We will plan to spend twenty days at Bouvet and weather permitting, we plan to have 14 to 16 good days of radio activity.

This will be an arduous and expensive mission. Our budget is \$764,000 USD and the 3Y0J team will fund much of this mission. We desperately need the global DX Community to support our mission and help us make this important activation of the #2 most wanted DXCC entity. It is only through this kind of support that we can achieve our mission of making 100,000 contacts or more from Bouvet.

We plan to make best use of Propagation and Modes on 10-160 meters.

We pledge to assemble the strongest team possible and to use good operating practices to optimize your ability to reach our stations. We are confident that the Braveheart crew can get us there and back safely.

In closing, we especially wish to recognize and thank the Northern California DX Foundation and the International DX Association as our premier donors. Without the support of the NCDXF and INDEXA, operations to the world's rarest entities would not be possible.

You can follow our plans from [our website](#) and the [3Y0J Facebook](#) page.

3Y0I Bouvet Island -update by Rebel DX Group regarding the announced Dxpedition 3Y0J

Due to the hundreds of emails today regarding our plans for 3Y0I, the answer is nothing has changed after the 3Y0J announcement. We are on track for this year's activity from Bouvet Island by end of the year.

MS0INT Bass Rock EU-123 –update

With earlier concerns about the trip being postponed due to Covid, the team report this IOTA expedition is still on. They are watching closely weather & sea forecasts as landing is very difficult; even a small swell will not allow a landing. Activity planned for 20, 30 and/or 40m + VHF station too. Probably CW and SSB only. QSL via EB7DX.

*A reminder that, although IOTA EU-123 is not rare, the Bass Rock itself has only ever been activated three times (1997, 2001, 2008).

Our diploma program has been around for 20 years, and its main goal is to get cfm for QSO with all districts of Russia.

We have developed an automatic RDA district cfm specifically for fulfilling the requirements of the diploma program:

<https://mydx.eu>

This service makes the participation as easy as possible. You do not need to create an application and send it to the Diploma Manager – all you need to do is to send in your payment and your post address. You can get either one or several diplomas – it is up to you. For your convenience we have created special version of RDA dx-cluster where you can easily see those RDA-s that you don't have confirmed yet.

You also have a possibility to have a sound notification when your

unconfirmed RDA is spotted. Go and check it out:
